retorio GmbH

Hiring Team

Application: Working Student, AI Engineer, Agentic Systems in Munich

Dear Hiring Team,

I am writing to apply for the Working Student position in AI Engineer, Agentic Systems at retorio in Munich. As a Master's student in Data Science and Analytics at SRH Heidelberg based in Mannheim, the mix of designing agentic systems with tool calling and retrieval and holding them to a rigorous evaluation bar with eval datasets and A/B testing maps very closely to the projects I have shipped in the last several months.

In my Multi Agent RAG project I built a full LangGraph orchestrated agent system with tool calling, retrieval, and structured outputs that answers policy questions end to end. I implemented a JudgeAgent that scores answers on 5 dimensions in JSON mode at temperature 0, and eliminated self preference bias by running the judge on a different local model from the generator, plus an EvalAgent computing 5 retrieval metrics and 4 generation metrics into JSON and Markdown reports. That same discipline, measuring an agentic system honestly rather than trusting it by default, is exactly what a rigorous evaluation loop with eval datasets and observability tooling needs.

In my Movie Analytics and ML Pipeline project I built an end to end batch pipeline on GCP that pulls data into a GCS data lake and processes it through a 3 tier Bronze Silver Gold medallion architecture in BigQuery on Cloud Run, running on a fully automated Cloud Scheduler trigger with 0 manual interventions. That experience with containerized GCP deployment, monitoring, and cost aware scaling maps directly onto the DevOps ownership side of building agentic systems in production.

I work comfortably in Python, backend APIs, and cloud deployment on GCP, and I am currently on Cloud Run, container based deployment, and CI and CD. I hold the NVIDIA Building LLM Applications With Prompt Engineering, AWS Academy Cloud Foundations, and Google Data Analytics certificates and was recognised as a Finalist of the USAI Global AI Hackathon 2026 at Graduate Level. I am fluent in English and B1 in progress in German. As a working student I can join in Munich for around 20 hours a week immediately and would welcome the chance to discuss how I could contribute to your agentic systems team.

Kind regards,

Rahul Rawat
